

Final Report

Rate each piece of evidence out of five, with five meaning it gives definite proof of Nessie's existence and zero meaning it disproves the Loch Ness Monster. Record any other explanation for the event.

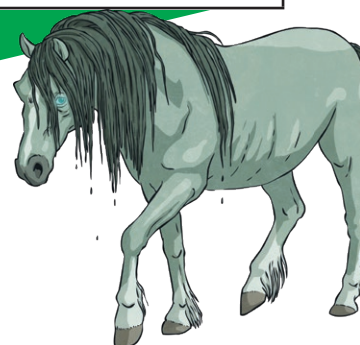

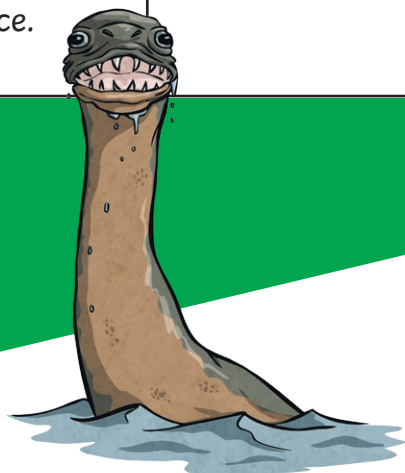

Evidence	Nessie Rating /5	Other Explanation
Pictish Carvings		
Saint Columba		
1933 Disturbed Water		
Mr and Mrs Spicer's sighting		
The Surgeon's Photo		
Hunt for Nessie		
Operation Deepscan		
DNA Survey		

Final Report

Rank the theories from one to five, with one being the most likely and five being the least likely. Add notes explaining your ranking.

Theory	Ranking 1-5	Notes
Nessie is a plesiosaur that has survived the Ice Age.		
Nessie is a Kelpie from Celtic folklore.		
Nessie is an unusually large native fish, such as an eel or sturgeon.		
Sightings of Nessie have natural explanations, such as unusual wave formations, other animals and boats in the loch or seismic activity from the fault line below.		
Nessie is a real creature, unknown to science.		

Final Report

Commentary on the Evidence

Summarise your thoughts on the evidence. Highlight anything that you think has a clear explanation and anything that could provide evidence to support Nessie's existence.

Commentary on Theories

Which theories are you dismissing and which do you think could be full or partial explanations? Make reference to the evidence if you can.

Conclusion

Draw together your thoughts on individual events and your assessments of the theories to provide your own explanation or summary.

Final Report

Write an introduction to the Mystery of the Loch Ness Monster. Summarise your thoughts on the events. Then, assess the merits of the theories and propose your own explanation.
